

REMARKS

Claims 1-13 remain pending in the application. Claims 1-8 and 10-13 have been allowed. Claims 9-10 have been amended. Claims 14-27 have been withdrawn from consideration

Claim 9 stands rejected under 35 U.S.C. 112, second paragraph, as being indefinite.

Applicants have now amended Claim 9 to correct the stated insufficiency of antecedent.

As a result of the foregoing amendments, Applicants believe that the amended claim 9 is now free of rejection under 35 U.S.C. 112, second paragraph, and respectfully request that the Examiner reconsider and withdraw the rejection of the stated claims based thereon.

The drawings stand objected to under 37 C.F.R. 1.83(a) for failure to show the feature recited in the claims as "facing said first electrode, wherein said first and second electrodes are respectively capped by a metallic contact."

Applicants have now amended the drawings by incorporating the aforementioned feature. Replacement sheets are provided herewith. No new matter is believed to have been entered.

Accordingly, Applicants believe that the amended figures now show all the features specified in the claims, and respectfully request that the Examiner reconsider and withdraw the stated objection to the drawings under 37 C.F.R. 83(a).

In view of the foregoing amendments, Applicants respectfully request that all the

objections to this application be reconsidered and withdrawn and that the Examiner pass all the pending claims to issue.

Respectfully submitted,

HARIKLIA DELIGIANNI, ET AL.
